

TRÀ TRIỆU Mẫn

AI Engineer Intern

ABOUT ME

Ambitious third-year Computer Science student specializing in Artificial Intelligence. Experienced in data processing, AI/NLP model training, and building scalable APIs with FastAPI and Flask. Proficient in both SQL and NoSQL databases, with hands-on experience on real-world RAG chatbot projects.

EDUCATION

FPT University

- **B.Sc. Computer Science (AI Track)**
- 2022 - Present
 - Awarded 70 % tuition scholarship

SKILLS

Programming: SQL, Python

Database: Firebase, MySQL,

PostgreSQL, MongoDB, Pinecone

Tools: VSCode, Github, Huggingface

AI: LLM, Embedding Models,

Retrieval-Augmented Generation

(RAG)

PROJECT

○ Pixity - A RAG chatbot for tourists in Da Nang

- Role: Back-end developer
 - Processed and indexed tourism datasets and built embedding pipelines using **PostgreSQL**, **Pinecone**, and **MongoDB**
 - Integrated **Gemini's API** for both large-language-model inference and embedding generation
- Team Size: 3 Members
- github: <https://github.com/ManTT-Data/PixAgent>

ACTIVITIES

○ Innovative Technology Student Club

2023 - Present

- Role: Technical Lead (August 2024 - Present)
- Activities:
 - Host Talkshow **UNLOCKING THE FUTURE: STEP INTO AI x BLOCKCHAIN**
 - Host Talkshow **Solana Spark 101**
 - Organize training sessions on Data Analysis and Data Science

○ EVo - FUDA Event Club

2022- 2023

- Role: Technical committee member
- Activities:
 - Participate in organizing events at FPT school

○ Solana Superteam Student Club

2024- Present

- Role: Member
- Activities:
 - Participate in organizing meetings, sharing about Blockchain and Web3
